

Russell Hobbs®

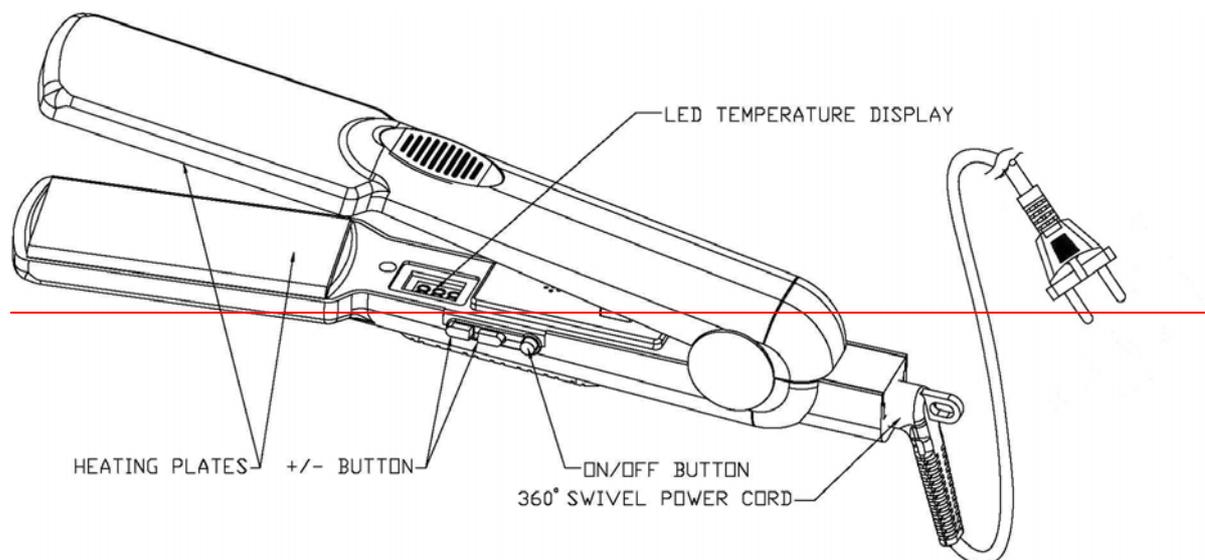

WARRANTY AND INSTRUCTIONS

**MODEL NO: RHS02
RUSSELL HOBBS STRAIGHTENER –
SLANTED MODEL**

Thank you for purchasing the RUSSELL HOBBS CERAMIC STRAIGHTENER (Model RHS02). This appliance has been designed to be used on dry hair as well as on towel-dried hair and the ceramic coated blades ensure that you can obtain a sleek looking style. It is not recommended for commercial use but for domestic use. Please read the instructions carefully and keep them safe for future reference.

KEY DIAGRAM.

FEATURES:

- Temperature reached from 80°C to 210°C
- Ceramic heating plates
- Instant heat up
- Digital temperature control
- On/off switch

OPERATION

- Plug the unit into an electrical outlet.
- Press the on/off button to turn it on.
- Press the on/off button for about 2 seconds, the LED display on the unit will be display " OFF " . The unit will beep simultaneously.
- Use the manual control buttons (+/-) to select the desired temperature.
- The micrometric temperature control allows the user to choose the appropriate temperature for each type of hair with precision. Every time

you press the " +/- " button will increase or reduce 5°C. The unit will beep simultaneously every time you press it.

- The Straightener automatically adjusts to international voltage 230- 240V~. 35-40W – meaning that the temperature reached on the unit may only be 180Degrees and not 200 – which may vary according to where you live.
- After use, press the on/off button to turn the unit off, and unplug the unit.
- Allow the unit to cool before storing it.
- If after 45 seconds the unit is not operated but is still switched on, the automatic protection feature will turn the straightener off , and the LED display will display "OFF".

STYLING SUGGESTIONS

The Straightener automatically adjusts to international voltage 230- 240V~. 35-40W

- After plugging in the appliance, switch on. The power indicator will light up reminding you that the straightener is on. It will take about 1 minute for the appliance to heat up to the ideal temperature for carrying out styling.
- To make styling easier, section the hair with clips or hair-bands. Please note that these are not included with the product.
- For best results, apply any styling products prior to straightening.
- Always start at the back of the neck, working up the sides and towards the crown. Finish with the hair at the front.
- Always straighten the lower layers first.
- Take a small section of hair, pull it taut and close the straightener firmly around the hair closest to the scalp i.e. at the roots.
- Run the straightener through the entire length of hair, slowly and steadily, from the roots to the ends without stopping.
- Repeat until the desired amount of straightening or the desired style has been achieved.
- If using on damp hair, you may hear a hissing sound as the excess water evaporates through the vents and the moisture is sealed in. It is not recommended that you use the straightener on wet hair!
- Some stylists recommend using a comb or brush on the front pieces of hair to ensure that the hair in the straightener is straight and even.
- You may find that the roots need to be briefly blow dried if you have been unable to get very close to the scalp. This is normal and can be addressed after styling.
- These straightening irons become very hot, especially when set to

maximum. We recommend always establishing your hair type before straightening and always test them on a strand of hair to check that the setting is appropriate for your hair.

- Not all hair types are the same and therefore do not tolerate the same heat levels. As a rule of thumb, Caucasians have more delicate hair than people of other ethnical background such as Asian, African, and so on. The following diagram shows the temperature that is usually appropriate for each type of hair, However, these temperatures may vary according to where you live and voltage output you receive in your home.

160°C-170°C	Fine and delicate hair
180°C-190°C	Intermediate hair
190°C-200°C	Thick and resistant hair

Please keep all vents and openings clear of dirt and dust. if cleaning becomes necessary, be sure to unplug the appliance a soft cloth to wipe unit clean.

NOTICE

This product has technology that lets it reach the selected temperature in less than a minute. It is therefore unnecessary to leave the unit on continuously. Consequently, to ensure a long life and to limit its energy consumption, we recommend turning the unit off when it is not in use.

SAFETY INFORMATION

- Always ensure that the power used corresponds to the one indicated on the rating label.
- **NEVER immerse the unit, plug or power cord in water or in other liquids. NEVER use the device near bath tubs, showers, in very damp places or containers full of water.**
- Always unplug the device after use.
- If it is necessary to rest the straightener while it is heating up or in use, always place the unit on a flat, heat-resistant surface.
- Do not use the device if it is defective, if it has been dropped or if the power cord is damaged. If the device breaks down and / or functions incorrectly, unplug it and do

not tamper with it. For any repairs, contact an authorized technical service centre.

- If the power cord is broken, cut or damaged, immediately contact a technical service centre to have it changed.
- Do not attempt to open or dismantle any part of the appliance. Responsibility for failure cannot be accepted if this instruction has been ignored.
- Once styling is completed, unplug the appliance and leave to cool completely before packing away for storage.
- Make sure that during usage the cord does not come into contact with the hot parts of the appliance or other hot surfaces.
- Do not roll the power cord around the appliance.
- Never unplug the appliance by pulling on power cord or the appliance itself.
- Do not touch the appliance when hands or feet are wet.
- Do not use the appliance outdoors.
- This unit is intended for household use only. Industrial or Commercial use invalidates the warranty.
- Close supervision is required when the appliance is used near or by children and invalids.
- Before carrying out any cleaning or maintenance operation, unplug the appliance from the socket and leave the straightening plates to cool.
- Avoid allowing the hot plates of the straightener to come into contact with the face, neck or scalp.

SAFETY

- Please note that the straightener has a built-in safety device that switches the unit off 60 minutes after the appliance has been switched on. If this occurs, it can be reset by sliding the power switch to OFF position and then switching it on again.
- The straightener has another built-in safety device that switches the unit off when the handle is folded up. If this occurs, the appliance can be operated again by unfolding the handles, sliding the power switch to the OFF position and switching it ON again.

CLEANING AND MAINTENANCE

- Ensure that the unit is unplugged and cool before cleaning. Clean the outside of the handle with a damp cloth.
- Wipe the ceramic plates clean of any styling product build-up.

- **Do not use any abrasive cleaning agents on the ceramic coated plates as this will damage the surface and the effectiveness of the plates. The warranty does not cover misuse.**
- Avoid wrapping the cord around the unit as this will, with time, cause damage to the power cord.

SERVICING THE APPLIANCE

There are no user serviceable parts in this appliance. If the straightener is not operating correctly, please check the following:

- You have followed the instructions correctly
- That the unit has been wired correctly and that the wall socket is switched on.
- That the mains power supply is ON.

If the appliance still does not work after checking the above:

- Consult the retailer for possible repair or replacement. If the retailer fails to resolve the problem and you need to return the appliance, make sure that:

- The unit is packed carefully back into its original packaging.
- Proof of purchase is attached.
- A reason is provided for why it is being returned.

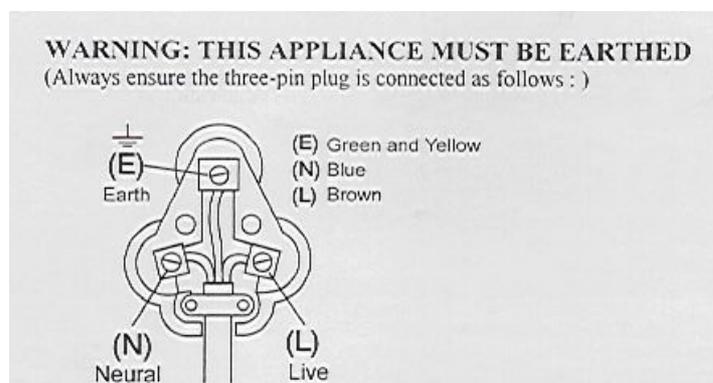

If the supply cord is damaged, it must be replaced by the manufacturer or an authorized service agent, in order to avoid any hazard. If service becomes necessary within the warranty period, the appliance should be returned to an approved Amalgamated Appliance (Pty) Ltd service centre. Servicing outside the warranty period is still available, but will, however, be chargeable.

CHANGING THE PLUG

Should the need arise to change the fitted plug, follow the instructions below.

This unit is designed to operate on 220 - 240V current only. Connecting to other power sources may damage the appliance. Connect a three-pin plug as follows:

The wires in this mains lead are coloured in accordance with the following code:

Green/Yellow = Earth

Blue = Neutral

Brown = Live

**PLEASE AFFIX YOUR PROOF OF PURCHASE/RECEIPT HERE
IN THE EVENT OF A CLAIM UNDER WARRANTY THIS RECEIPT MUST BE PRODUCED.**

W A R R A N T Y

Amalgamated Appliances (Pty) Limited (“the Supplier”) warrants to the original purchaser of this product (“the Customer”) that this product will be free of defects in material and workmanship which under normal, personal, family or household purpose manifest themselves within a period of 365 days from the date of purchase or in respect of commercial or professional purposes, manifest themselves within a period of 90 days from the date of purchase. Any claim in terms of the warranty must be supported by a proof of purchase. If such proof is not available, then notwithstanding anything to the contrary herein, the Supplier’s normal charge for service and/or spares will be payable by the Customer upon collection of the repaired product. If a claim is made in terms of the aforesaid warranty within the first 7 days from the date of purchase, the faulty product will be exchanged (provided that the product is in its original packaging with all accessories). Failing return of the product within 7 days, the Supplier’s liability shall be limited on return to the Supplier of the product or parts thereof, to the replacement or repair (in the sole discretion of the Supplier, or its duly authorised service dealer) of the product to eliminate any defect in workmanship or materials found to be due exclusively to any acts or omissions on the parts of the Suppliers, of which defects the Supplier shall have been notified in writing by the Customer within the aforesaid warranty period. The warranty provided herein and the obligations of the Supplier as aforesaid are in lieu of, and the Customer waives, all other warranties, guarantees, conditions or liabilities, express or implied, arising by law or otherwise, including without limitation, any obligation of the Supplier in respect of any injury, loss or damage (direct, indirect or consequential) arising out of the use of, or inability to use, this product and whether or not occasioned by the Supplier’s negligence (gross or otherwise) or any act or omission on its part. The warranty does not include and will not be construed to cover products damaged as a result of disaster, misuse, abuse or any non-authorised modification of the product. The warranty does not include replacement of light bulbs, heater bars, paper bags or any glass, plastic bowl or jug or other expendables. During the warranty period the product should be taken to a service centre of the Supplier or one of its duly authorised service agents. The Supplier neither assumes nor authorises any other person to assume for it, any additional liability in connection with the sale or servicing of its products.
